

Submission Summary

Conference Name

3rd International Conference on Information Technology and Intelligence

Paper ID

251

Paper Title

Digital Forensics in Cybersecurity: Techniques for Effective Evidence Investigation

Abstract

The digital forensics process is vital in today's cybersecurity landscape since it facilitates the identification, collection, preservation, and analysis of digital evidence in cybercrime cases. In the face of rising digital technologies and threats like malware attacks, data breaches, and access violations, it is imperative to have efficient forensic investigation techniques. This research analyzes various methodologies and tools used for advanced digital forensics and their impact on improving digital investigation. An experiment involving simulated cyberattacks was conducted within the framework of virtual machines. The tools like Autopsy and Wireshark were used in collecting and analyzing evidence in the experimental setting. Furthermore, techniques of automation using scripting languages like Python and Bash scripts were employed to speed up the investigation process. The findings show that a well-structured process of digital forensics coupled with automation improves the efficiency of the evidence collection and analysis.

Submission Questions Response**1. Conflict of interest**

The authors declare no conflict of interest and all authors are aware of this submission. In case of any conflict submitting author will be responsible.

Agreement accepted

2. Status of using third-party material in your article.

Third party content is defined as any material within the manuscript which is not your original work. Third party content may consist of text passages, figures, photos, screenshots, etc. and be found in many places such as but not limited to - the Internet, print and online books and articles, theses, annual reports, conference material, photocopies, course packages, translations, visually impaired readers. In particular, pay close attention to sensitive images such as identifiable persons or human research participants, recognisable architecture, logos, brands/trademarks, and images from online photo libraries. Please refer to Springer Nature Guide to Copyright and Permissions for further guidance. You are responsible for clearing the rights for third party content under your publishing agreement. Please confirm if your manuscript contains any third-party content?

I am not using third-party material for which formal permission is required.

3. Certificate of originality

This is to certify that my submitted research paper is an outcome of my research work. I have duly acknowledged all the sources from which the ideas and extracts have been taken. The submitted paper is free from plagiarism and has not been submitted elsewhere for publication. I am aware that the publisher/conference organizer can reject it at any publication stage if it is found to be plagiarized or machine-generated (AI-Generated).

Agreement accepted

4. Corresponding Author's Contact number

Please provide the Contact number of the Corresponding Author, including the Country code.

+91 9915369888

5. Country Name

Please provide the Name of the country where most authors belong.

India

6. Authors Contributions

Please specify individual authors' contributions in the research as recommended by the Committee on Publication Ethics (COPE).

(e.g. , study conception and design: Author_1, Author_2; data collection: Author_2; analysis and interpretation of results: Author_1, Author_2, Author_3; draft manuscript preparation: Author_2. Author_3. All authors reviewed the results and approved the final version of the manuscript.)

An author name can appear multiple times, and each author name must appear at least once. For single authors, use the following wording:

The author confirms sole responsibility for the following: study conception and design, data collection, analysis and interpretation of results, and manuscript preparation.

Study conception and design: Anushka;

Implementation and experiments: Anushka, Vriti Jaitley;

Visualization and documentation: Drishti Bhardwaj, Vriti Jaitley;

Analysis and interpretation of results: Geetanshu Mantro, Drishti Bhardwaj;

Supervision and guidance: Dr. Shikha Tuteja;

Manuscript drafting: Anushka;

Manuscript review and final approval: All authors.

7. Conference Rules and Guidelines

I am agree with Conference Rules and Guidelines given at

https://scrs.in/conference/iti2026/page/Conference_Rules_and_Guidelines

Agreement accepted
